

Jeweled Lollipop Sticks

Give your sticks some bling by adding faux crystals from the craft store.

Ingredients

Round 4mm or 3mm self-adhesive faux gemstone sheets

Large or small lollipop sticks

Hot glue gun & glue sticks

Directions

1. For Large lollipop sticks, use 4mm size gems, and the 3mm for the small sticks.
2. Determine how far up the length of the stick you would like to cover in the gems. For the width, you will need 4 crystals across if using the 4mm for the large sticks and 3mm for the small sticks. Cut into strips and remove the backing.
3. Using a hot glue gun, apply a thin line of glue to the bottom row of gems. Lay stick overtop of the bottom row of gems and try to align as straight as possible. Apply another thin line of glue to the top row of gems. Roll up, pressing firmly to adhere gems.
