

## Natural Carpet & All-Purpose Deodorizer

This natural deodorizer will freshen everything from carpets to shoes to your refrigerator! Customize with your favorite essential oils to make a scent you love. Try mixing lemon with lavender, orange, or tangerine essential oils for a refreshing blend.

### Ingredients

1 cup baking soda  
Up to 30 drops natural essential oils of your choice.

### Directions

In a glass jar with a lid\*, shake together baking soda and essential oils until oils are well dispersed.

To use:

- To freshen carpets, sprinkle liberally over carpets or rugs. Allow to sit for at least 30 minutes. Vacuum well.
- Sprinkle lightly in shoes to freshen.
- Remove lid and place in refrigerator. A combination of lemon & orange oils is great for the fridge!

\*A glass jar with a perforated lid, such as a parmesan cheese shaker works well. Or make your own! Start with a mason jar and cut out a round of construction paper to fit over the mouth of the jar. Punch out a few holes using a hole punch. Slip the paper over the mouth of the jar and secure with the screw top from the mason jar.
