

Scented Pinecones

Ingredients

Pinecones
Fragrance Oil of your choice
(Cinnamon super-strength flavoring can also be used)

Directions

1. If pinecones are sticky with sap, place on a foil or parchment lined baking sheet and heat in a 200°F oven for 30 to 45 minutes until pinecones open up. Heating will dry the sap and kill any bugs that may still be in the pinecones.
2. Place pinecones in gallon sized zip-top bags and add 1/2 teaspoon fragrance oil per bag.
3. Seal bag and shake to distribute oil. Allow pinecones to sit at least 1 week, turning bag once or twice. The longer cones are left in the bag, the stronger the scent will be.
4. Display on a non-porous tray or bowl with greens, if desired.
