LORANN'S CANDY KITS MAKES HOMEMADE CANDY EASIER THAN EVER

When it comes to the home candy maker, LorAnn understands they want high-quality, professional ingredients and simplicity when it comes to creating delicious hard candies or gummies. Packaged conveniently in an all-inclusive kit, LorAnn's newest candy kits make it easier than ever to make homemade candy with their perfectly formulated candy mixes, flavors, colors, and candy making accessories. With five kits to choose from—where each kit includes silicone molds designed for easy release and keeping the candy structure, delicious flavors, and bold colors specially curated for each kit, and candy making tools and accessories—these kits are sure to turn you into a candy making pro. Looking for activities to do with the kids this holiday season? These kits make for a fun family activity!

LorAnn's Super-Strength flavors are the secret ingredient to flavoring your best lollipops, hard candies, and gummies. Each flavor is 3-4 times stronger than a typical extract and can withstand the high temperatures in candy making so that you never have to skimp on flavor.

"The flavor variety and combinations in hard candy and gummies we have seen from our customers are exciting and delicious," says Mandy Robbins, Marketing Communications. "Much of their inspiration and from recipe testing at LorAnn has inspired the flavors, colors, and mixes selected for these kits. By including all ingredients and accessories, these kits make the candy-making experience for our customers greater and allows them to put their focus on the creativity in the kitchen. It has been so fun putting these kits together to bring something special to our customers."

In addition to delicious flavor, LorAnn's Liquid Gel Food Colors are highly pigmented and can help you achieve bold and vibrant colors in your homemade candies. Like most gel food colorings/paste, LorAnn's Liquid Gel Food Colors are water-based and contain glycerin, where the semi-thick coloring creates a more concentrated form of food coloring in less drops, making it a cost-effective option for those who do a lot of candy making. Most desired colors with LorAnn's Liquid Gel Food Colors can be achieved in as a little as 3-4 drops.

Not only does LorAnn offer sizing in mixes and flavors that are ideal for the home consumer, but they also offer bulk sizes for the professional confectioner and baker. To respond to those with special dietary needs, a sugar-

free candy kit is also available. Nearly all LorAnn's flavors are certified Kosher, gluten-free, unsweetened, keto-friendly, and suitable for vegan diets.
